

Project Design Phase-II

Data Flow Diagram & User Stories

Date	5 September 2026
Project Type	Individual Project
Student Name	Samudrala Sujana
Project Name	An Employee Requests Installation of Licensed Software through the Service Catalog
Maximum Marks	4 Marks

1. Data Flow Diagram

The Software Installation Request Automation system streamlines the complete lifecycle of licensed software requests. An employee submits a request through the ServiceNow Service Catalog, the request goes through approval, a catalog task is created for the IT Support team, and the request is fulfilled and completed. An email notification is also generated after submission.

The high-level process flow is shown below:

Software Installation Request Automation - Flow Diagram

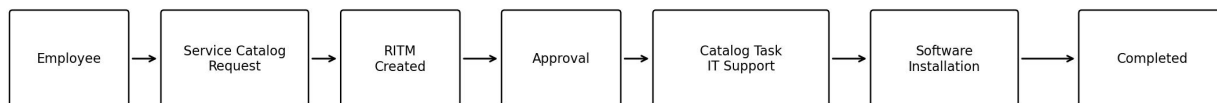

Figure 1: High-Level Software Installation Request Flow

Flow Description

- Employee opens the ServiceNow Service Catalog and selects the Software Installation Request item.
- Employee enters software name, version, license justification, and urgency.
- The request is submitted and a Requested Item (RITM) is generated.
- A confirmation email notification is triggered for the submitted request.
- The request follows the configured approval process.
- After approval, a Catalog Task is created and assigned to the Software Support/IT Support team.
- The support team fulfills the request by installing the required licensed software.
- The request status can be tracked until the task and request are completed.

2. User Stories

The following user stories define the major functional requirements of the project.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Employee	Software Request	USN-1	As an employee, I can request installation of licensed software through the ServiceNow Service Catalog.	The employee can successfully submit a software installation request.	High	Sprint-1
Employee	Request Details	USN-2	As an employee, I can provide software name, version, license justification, and urgency.	All required catalog variables are captured with the requested item.	High	Sprint-1
Employee	Email Notification	USN-3	As an employee, I receive an email confirmation after submitting my request.	A submission confirmation email is generated successfully.	Medium	Sprint-1
Approver	Approval Management	USN-4	As an approver, I can review and approve or reject a software request.	The request follows the configured approval process before fulfillment.	High	Sprint-1
IT Support Team	Task Fulfillment	USN-5	As an IT support member, I receive a catalog task for an approved request.	A catalog task is created and assigned to the appropriate support team.	High	Sprint-1
Employee	Request Tracking	USN-6	As an employee, I can track my software installation request status.	The request and related task status are visible until completion.	Medium	Sprint-1
