

Project Development Phase

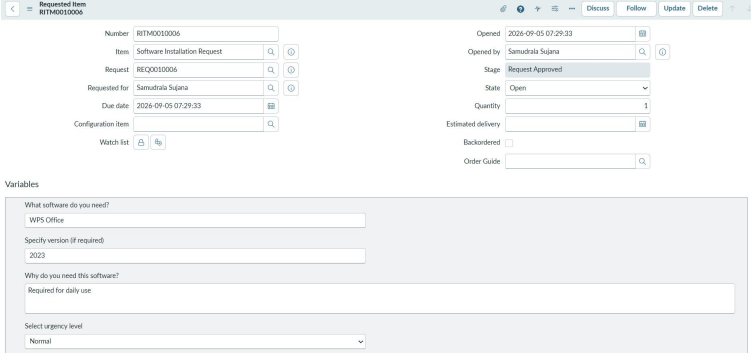

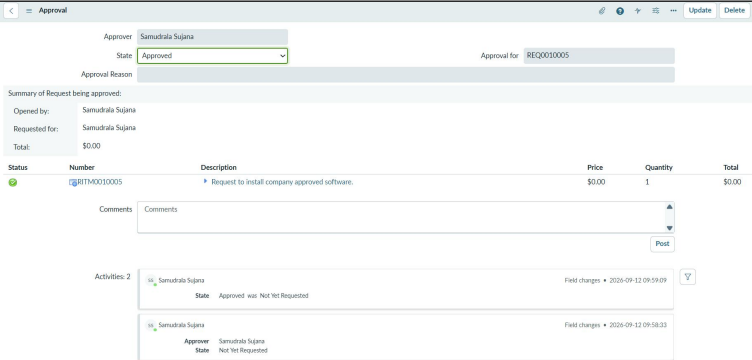

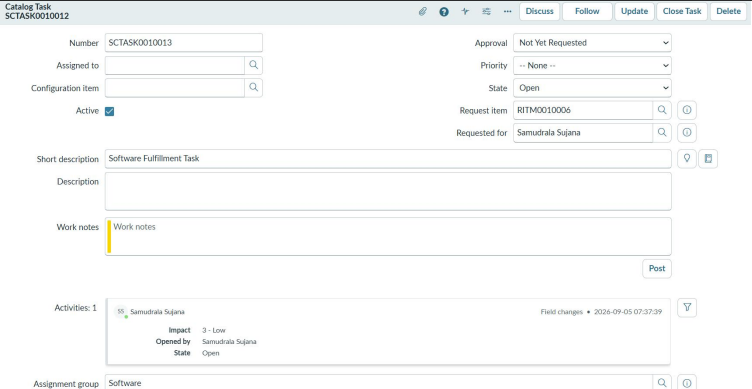

Project Testing & Validation

Date	11 September 2026
Team ID	Individual Project
Student Name	Samudrala Sujana
Project Name	An Employee Requests Installation of Licensed Software through the Service Catalog

Software Installation Request Testing:

Project team shall fill the following information in the project testing and validation template.

S.No.	Parameter	Values	Screenshot
1.	Service Catalog Item	Software Installation Request catalog item is created and accessible.	 The screenshot shows the 'Catalog Item' creation interface for 'Software Installation Request'. Fields include Name, Application (Global), Category (Software), State (None), Checked out (None), Owner (Samudrala Sujana), and Secondary owners. The 'Fulfillment automation level' is set to 'Unspecified'. The 'Item Details' tab is active, showing a short description and a rich text editor with the text: 'Request to install company approved software. Allows employees to request software installations. Fulfills via Software Support Team.'
2.	Request Submission	Employee submits Software Name, Version Required, License Justification, and Urgency.	 The screenshot shows the submission form for 'Request to install company-approved software'. It includes fields for 'What software do you need?', 'Specify version (if required)', 'Why do you need this software?', and 'Select urgency level.' (set to Critical). On the right, there's a sidebar with 'Order this Item' (Quantity: 1, Delivery time: 0 Days), 'Order Now', 'Add to Cart', and 'Shopping Cart' (Empty).
3.	Request (REQ)	A Service Catalog Request (REQ) is generated after submission.	 The screenshot shows the details of a generated Request (REQ) with ID REQ0010006. Fields include Number, Requested for (Samudrala Sujana), Location, Due date (2026-09-05 07:29:33), Price (\$0.00), and Description. On the right, there's a sidebar with 'Opened' (2026-09-05 07:29:33), 'Opened by' (Samudrala Sujana), 'Approval' (Approved), and 'Request state' (Approved).

4.	Requested Item (RITM)	The RITM is created and contains the submitted catalog variables.	
5.	Approval	The request is routed to the authorized approver for approval or rejection.	
6.	Fulfillment Task (SCTASK)	After approval, a Catalog Task is created and assigned to the Software Support Team.	
7.	Task Completion	The Software Support Team completes the software installation task and updates the task state.
